

Dear EphMRA and PBIRG members,

The EphMRA/PBIRG Classification Committee has a Learning Opportunity that is open to pharmaceutical company analysts with 2-3 years of relevant experience.

This opportunity has a focus on conducting secondary research into product classification and potential new categories; share responsibility for a therapeutic class, under the mentorship of a full Committee member; attend meetings and join in Committee discussions of therapeutic classes and individual product classifications. Participation in these open discussions with experienced Committee members will provide the person with in-depth understanding of the global pharmaceutical industry, a broad range of therapeutic areas, research trends and the industry-WHO relationship. The person will also gain knowledge of the audit databases.

The Committee benefits by having more input and by having a person who could eventually become a full committee member.

The Company would benefit from the extensive training and the wealth of knowledge that the analyst would bring back to the Company.

There will be a Certificate of Recognition from the Executive in appreciation of your contribution.

The cost of attending Committee meetings will be borne by the Associate's company.

An application form for this position follows. Please return the form to either Bernadette Rogers (EphMRA) or Carol Reilly (PBIRG):

Bernadette Rogers  
General Manager, EphMRA  
Telephone: [44] 161 304-8262  
Fax: [44] 161-304-8104
